

# Life In The Envelope: Maneuvering Speed, V-n Diagrams, and Angle of Attack

This seminar will explore all aspects of the V-n diagram, an incredibly useful but often overlooked depiction of much of an aircraft's flight envelope. The relationship of maneuvering speed and angle of attack along with the relationship of pitch rate and turn radius to speed will be examined in detail with real world applications.

**Directions:** Exit US 30, turn right onto the access road and left before the chain link fence. Enter Gauntlet's office on your left.

## A message from the National FAASafetyTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!
